Ryan Mora

3000 Greenridge Houston, TX 77075 | (808) 343-4542 | ryan.mora23@gmail.com

---

OBJECTIVE: Seeking a challenging entry-level position as a software developer to build upon my knowledge and contribute to the success of an elite team.

EDUCATION:

The Iron Yard | Houston, TX   (completion date 12/14)
Three month intensive front-end boot camp, which provides training on the essential tools required to be a successful web developer. Areas of study include CSS, HTML, JavaScript, Backbone, and JQuery

Projects:
> *Color Clock: Uses javascript to change color of background depending on the time.*
> > *url: ryanmora23.github.io/ColorClock*
> > *code: github.com/ryanmora23/ColorClock*

> *Etsy App: Uses Etsy's API to pull down 25 latest listings and print them to screen. Shows more detail once you click an item (Work in progress)*
> > *url: ryanmora23.github.io/Etsy-App*
> > *code:github.com/ryanmora23/Etsy-App*

> *Dating Site: Worked with a partner to create a website that Uses Yummly's API, forecast.io, and Spotify. This site helps you to plan a date (Work in Progress)*
> > *url: phyllistran.github.io/HITCH*
> > *code: github.com/phyllistran/HITCH*

> *Whats Your Mood? site: Created a website with team of 3 using Backbone to pull the API from Soundcloud and Giphy. Each button generates gifs and music in accordance with the selected mood.*
> > *url: emobot.herokuapp.com*
> > *code: github.com/tawfiqmp/EmoBot*

University of Illinois | Champaign, IL   2010
Majored in atmospheric sciences, acquired credits equivalent to an Associate's degree.

INTERNSHIP EXPERIENCE:

QA | Say Design, Irvine, CA   2011
Worked with a small team to test the quality and functionality of Flash games while meeting strict deadlines.
- Responsible for executing regression and black-box tests
- Reported, tracked and determined priority of bugs
- Managed day-to-day QA tasks as specified by project launch schedule
- Documented issues discovered during testing and resolved them with key team members
- Worked across departments to validate actual test results against expected results
- Easily adapted to rapidly changing environment while testing multiple projects
- Manually tested applications on various browser platforms
- Well-versed in software process methodologies
- A solid understanding of quality assurance as part of the development process
